

BE-Alg. I TUESDAY 11-3-09

- ① What is the Golden Rule of Equations? Of Inequalities.
 - ② Solve and graph the solution on a number line.

$$7 + 3x \leq 2(x+3) - 2(-1-x)$$

$$\underline{ANS} \quad 7 + 3x \leq 2x + 6 + 2 + 2x$$

$$7 + 3x \leq 4x + 8$$

$$-3x \quad -3x$$

$$\begin{array}{r} 7 \\ - 8 \\ \hline \end{array} \leq x + \begin{array}{r} 0 \\ - 0 \\ \hline \end{array}$$

$$= 1 \leq x$$

$$\therefore x \geq -1$$

• Homework Review: Pg 335 #4-8, 15-17 \Rightarrow LAPBOARD PRACTICE
