

Ch. 16 Carlisle

Edward & Bella visit with Carlisle to learn his history. He leaves for business at the hospital (to fill in for Dr. Snow) & Edward & Bella talk about historical pictures on wall. Turns out vampires are tough to kill. Carlisle lived on deer blood to avoid killing people. Carlisle swam the English Channel to go to France (vampires don't need to breathe). Carlisle became doctor to save lives. After 200 years he can control his thirst for blood. All the vampires are planning a baseball game in a thunderstorm. Really. I am not kidding.
